

**Criston Software & Prokom Software partner to  
provide integrated Vulnerability Patch and  
Configuration Management expertise in Poland**

**Criston Software, major European company in Vulnerability and Configuration Management Solutions and Prokom Software SA, a leading software developer and IT system integrator on the Polish market today announced their partnership.**

This partnership, targeting the Polish Market, will deliver Precision Management Suite, including Vulnerability , Patch and Configuration Management solutions to both SMB and large organisations, promoting ITIL based processes and driving compliance standards.

With ten years experience on the market, a large customer base worldwide, Criston's Solution successfully aligns to business needs and provides an effective and secure framework for the IT units.

"Our experts chose Criston Precision Management Suite because it extends our capabilities to the desktop management space and provides new opportunities in security management", said Przemyslaw Seczkowski, Prokom's Vice-President. "Criston offers one of the most complete and integrated solutions to complement our services as we support our customers in managing their IT assets, assessing global risk, updating and managing their desktops and servers."

Since the foundation Prokom is providing large and medium size businesses and public institutions with comprehensive IT solutions, and meeting the needs of the Polish market for technology advanced IT services and solutions Thanks to accumulated knowledge and gained experience, the Company became a non-questioned authority in designing and integrating of IT systems.

"We are very pleased that Prokom has selected Criston to extend their IT management solution set. This partnership will give customers in Poland a great resource to manage the overall IT infrastructure and to ease the burden and risk of ineffective patch & vulnerability management," said Marc Vaillant, CEO Criston Software. "The demanding nature of the Polish market fits perfectly with the maturity of our technology."
