

Criston KK & Canon System Solutions partnering

Criston KK & Canon System Solutions partnering to deliver integrated Vulnerability & Patch Management Solutions targeted at SMB Market in JAPAN

Criston KK [Minatoku,Tokyo] (subsidiary of Criston Software, Sophia-Antipolis, France a major international actor in overall IT Lifecycle Management Solutions)- and Canon System solutions KK [Minatoku,Tokyo] Leader in IT and Security Solution distribution today announced a new Business Partnership.

With ten years experience on the market and implanted in Tokyo since 2001, Criston leads organisations to successfully secure their overall IT infrastructure by diminishing the risks of ineffective configuration, patch & vulnerability management.

Under this new partnership, Canon System Solution will promote and deliver Criston fully operational Precision Management Suite including Vulnerability and Patch Management solutions to SMB from 50 to 4,000 users, through their direct sales and channel networks.

"We are delighted that Canon System Solutions has selected Criston to extend their offerings. This partnership is a major recognition of the innovative and reliable solutions developed by Criston and will help Japanese companies to align to business needs and to provide an effective framework for their IT units," says Marc Vaillant, CEO Criston Software. "The demanding nature of the Japanese market fits perfectly with the maturity of our innovative technology."

This partnership will provide customers in Japan with an innovative solution helping them to align to business needs and to provide an effective framework for the IT units," says Marc Vaillant, CEO Criston Software. "The demanding nature of the Japanese market fits perfectly with the maturity of our innovative technology."
